

HBS01-EPD

ABB Ability™ Symphony® Plus Hardware Selector

The HBS01-EPD mounting base is for the Singular Analog I/O (AI01, AI02, AI05, AD11, AO01, AO02, AO05) and Digital I/O (DI01, DI02, DI03, DI04, DO01, DO02, DI05) modules. The base is designed to accommodate field signals that are externally powered or are differential inputs

The base includes two (2) 16-point headers that provide connections to either (2) pluggable 16-point terminal blocks for direct connection of field signal wires or to SPK0x_yy marshaling cables when field signal wires are landed on 3rd party termination hardware.

Features and benefits

- Termination for up to sixteen (16) Analog or Digital I/O process signals within a horizontal row.
- All SD I/O modules & bases of all types (Singular or Redundant) AND (Compact or Full-size), are 100% fully compatible with each other. Thus, Singular & Redundant, Compact or Full-size I/O modules can be mounted within a single, common HN800 I/O bus.
- Optional mechanical keying can be implemented to prevent insertion of the wrong I/O module type.
- Latching device on the base locks the base into position on DIN-Rail.
- Industry standard 35-mm DIN rail, Horizontal row mounting.
